HKE SOCIETY'S

PDA COLLEGE OF ENGINEERING, KALABURAGI

(An autonomous institution, affiliated to VTU, Belagavi, Karnataka)

Internal Assessment Test -I

22CED23 Computer Aided Engineering Drawing- I SEM (B2)

Date: 03-05-2025 Time: 03:00 PM – 4:45 PM Maximum Marks: 40

Instructions to Candidates:

1.Answer all the Questions.2.Neatness carries marks. 3.Draw only manual for question no 1.

Q.NO	Question	Maximum Marks	CO	BL
1.a	A point P is on HP and 35 mm infront of VP. Another point Q is on VP and below HP. The line joining their front views makes an angle of 30 deg. to XY line, while the line joining their top views makes an angle of 45 deg. with XY line. Find the distance of the point Q from HP.	8	CO1	L3
1.b	A line AB 80mm long is inclined to HP at 45° and inclined to VP at 30°. End A touch VP & HP. Draw front and top views of line and determine their lengths. Also determine the perpendicular distance of end B from both HP and VP.	12	CO1	L3
2	A hexagonal lamina of edges 25mm is resting on HP with one of its sides such that the surface makes an angle of 60° with HP. The edge on which it rests is inclined at 45° to VP. Draw its projections.	20	CO2	L3

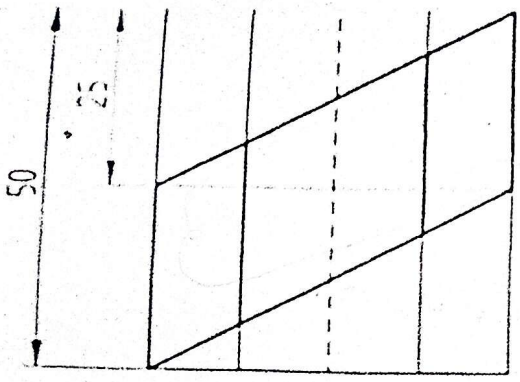

HKE Society's P.D.A. College of Engineering, Kalaburagi
Department of Mechanical Engineering
INTERNAL ASSESSMENT TEST – II Improvement

BE I SEM-G section
Date: 02/01/2026

Subject: CAED
Time: 10:0 AM to 12:00 PM

Sub. Code: CSCED103
Max Marks: 40

Note: Answer all the questions

Q NO	Question	Marks	Course Outcome	Level
1	A pentagonal pyramid 30mm side of base and 70mm axis length rests on HP on one of its edges of the base, which is inclined to VP at 30º. Draw the projections of the pyramid when the axis is inclined to HP at 40º.	15	CO3	L4
2	A cube of 50 mm sides rests on HP on an edge which is inclined to VP at 30º.Draw the projections when the lateral square face containing the edge on which it rests makes an angle of 50º to HP.	15	CO3	L4
3	A hexagonal prism of base side 20 mm and height 50mm is resting on HP on its base, such that one of its base edges is parallel to VP. The prism is cut in this position as shown in following front view. Draw the development of lateral surface of prism. 	10	CO4	L4

Course Outcomes	Total Marks Allotted	% Marks Allotted
CO3	30	100%
CO4	10	

Cognitive Levels-	Total Marks Allotted	% Marks Allotted
L1 to L2	-	-
L3 to L6	40	100%

(AN AUTONOMOUS INSTITUTION, AFFILIATED TO VTU BELAGAVI)

B.E.II SEMESTER END EXAMINATION, JULY– 2025

COMPUTER AIDED ENGINEERING DRAWING

(COMMON TO ALL BRANCHES)

Course Code: **22CED23** DURATION: 3 HOURS MAX.MARKS:50

NOTE: 1. USE FIRST ANGLE PROJECTION METHOD ONLY.
2. NEATNESS CARRIES MARKS.
3. SOLVE TOTAL THREE FULL QUESTIONS SELECTING ONE FULL QUESTION FROM MODULE I,ONE FROM MODULE II AND SOLVE EITHER MODULE III OR MODULE IV.
4. FOR ALL QUESTIONS, BOTH MANUAL SKETCH AND COMPUTER SKETCH IS REQUIRED.

MODULE I

Q.No1a) A point 30mm above XY line is the front view of three points E, F and G. The top view of G is 40 mm behind VP, the top view of F is on XY line and top view of point E is 45mm in front of VP. Draw the projections of the points & state the Quadrants in which the points are situated. **(05)**

Q.No1b A line PQ has its end P 20 mm above the HP and 30 mm in front of the VP. The other end Q is 60 mm above the HP and 45mm in front of VP. The distance between end projectors is 60 mm. Draw its projections. Determine the true length and apparent inclinations. **(10)**

Q.No2) A pentagonal lamina of edges 25mm is resting on HP with one of its sides such that the surface makes an angle of 60° with HP. The edge on which it rests is inclined at 45° to VP. Draw its projections. **(15)**

MODULE II

Q.No3) A Hexagonal pyramid 25mm sides of base and 50 mm axis length rests on HP on one of its triangular faces. Draw the projections of the pyramid when the axis is inclined to VP at 45 ^{0}. **(20)**

Q.No4) . A cone of base circle diameter of 50 mm and 65 mm axis length is resting on a base point on HP. Base makes 30^0 to HP. Draw the projection of the cone when the axis appears to be inclined at 45^0 to VP. **(20)**

MODULE III

Q.No5) The frustum of a square pyramid of base sides 40mm, top face side 20mm and height 60mm rest on the centre of the top of a square block of side 60mm and height 20mm. The base edges of the pyramid are parallel to the top edges of the square block. Draw the isometric projection of the combination of solids. **(15)**

MODULE IV

Q.No6) A rectangular prism of base 40mm × 25mm and height 65mm rests on HP on its base with the longer base side inclined at 30^0 to VP. It is cut by a plane inclined at 40^0 to HP; perpendicular to VP cuts the axis at its mid height. Draw the development of the remaining portion of the prism. **(15)**

Q1

B.E.I SEM EXAMINATION, JANUARY – 2026

COMPUTER AIDED ENGINEERING DRAWING

(COMMON TO ALL BRANCHES)

SUB.CODE: CSCED103 | DURATION: 3 HOURS | MAX.MARKS:50

NOTE: 1. USE FIRST ANGLE PROJECTION METHOD ONLY.
2. NEATNESS CARRIES MARKS.
3. SOLVE **TOTAL THREE FULL QUESTIONS** SELECTING ONE FULL QUESTION FROM **MODULE I**,ONE FROM **MODULE II** AND SOLVE EITHER **MODULE III** OR **MODULE IV.**
4. FOR ALL QUESTIONS, BOTH MANUAL SKETCH AND COMPUTER SKETCH IS REQUIRED.

MODULE I

Q.No1a) Draw the projections of the following points on the same XY line.

a) A is 30 mm in front of VP and 40 mm above the HP.
b) B is 40 mm behind the VP and 30 mm above the HP.
c) C is 35 mm behind VP and 20 mm below the HP.
d) D is 45 mm in front of VP and 50 mm below the HP. **(05)**

Q.No1b) A line AB 75 mm long has one end 20 mm in front of VP and 15 mm above HP. The line is inclined at 250 to HP and 400 to VP. Draw the front view and the top view of the line. **(10)**

Q.No2) A square lamina of 30mm side rests on one of its sides on HP. The lamina makes 30° to HP and the side on which *it rests makes 45° to VP. Draw its projections.* **(15)**

MODULE II

Q.No3) A pentagonal pyramid 25mm side of base and 60mm axis length rests on HP on one of its edges of the base, which is inclined to VP at 30º. Draw the projections of the pyramid when the axis is inclined to HP at 40º. **(20)**

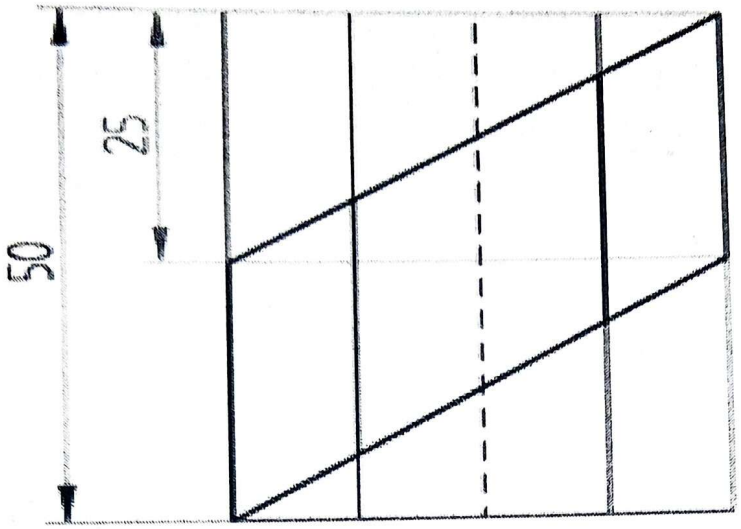

Q.No4) A cone of base circle diameter of 50 mm and 65 mm axis length is resting on a base point on HP. Base makes 30^0 to HP. Draw the projection of the cone when the axis appears to be inclined at 45^0 to VP. **(20)**

MODULE III

Q.No5) A rectangular pyramid of base 40mmx25mm & height 50mm is placed centrally on cylindrical slab of diameter 80mm & thickness 30mm.Draw the isometric projection of the combination. **(15)**

MODULE IV

Q.No6) A hexagonal prism of base side 20 mm and height 50mm is resting on HP on its base, such that one of its base edges is parallel to VP. The prism is cut in this position as shown in following front view. Draw the development of lateral surface of prism. **(15)**
